

EVOLUTION

ONE BOAT FOR THE REST OF YOUR LIFE

LUXURY AND VERSATILITY FROM TRINITY YACHTS

This new luxury explorer yacht from Trinity Yachts has been designed with versatility in mind. A variety of deck layouts are available, in either a "Bridge UP" or "Bridge Down" configuration. All layouts within each category are easily interchangeable, allowing the owners a variety of purposes over time, and giving them a potentially greater than normal service life expectancy with one boat.

The most luxurious version of this new offering from Trinity Yachts allows for a full owner's deck; with a private hot tub and master stateroom aft, and either a private lounge or second stateroom forward. The forward layouts are easily interchangeable at any time during the life of the vessel. Guest accommodations are also designed to be easily modified to suit a variety of purposes over time, from charter use to private family yacht. During construction at Trinity Yachts, allowances will be made to permit the owners to easily modify the boat to alternate configurations; efficiently and economically as personal needs dictate, during their term of ownership. This system also increases marketability at the time of sale. The boat can be easily converted by Trinity Yachts to the preferred configuration of a next owner. Layouts available for owner and guests range from master suite and two large VIPs, up to 5 or 6 stateroom layouts that may be found on a yacht typically used for charter.

There are accommodations for up to 12 crew. 8 crew members share 4 cabins, each with its own head. The first officer or chef, and the engineer, have private cabins, and the Captain's cabin is suitable for a couple. The boat could be operated safely and efficiently with as few as 10 crew, depending on the type of usage. There are also layouts available that provide a cabin for a family staff member who may not be part of the yacht's permanent crew. Among the most desirable features of this latest concept from Trinity Yachts, is the large aft sun deck that doubles as a touch and go heli-pad. The swim deck has a retractable extension, yielding an excellent staging area for diving, skiing and other water sports. The wide aft staircase provides bleacher like seating for spectators.

The upper deck features a hot tub, a generous covered lounge with grilling area, and optional "E-stations", that permit, internet access, and inter-active gaming as well as T.V. and private movie viewing under the stars. A unique feature of this deck is the solar activated awning style side windows, which act as sun visors when opened.

Evolution, from Trinity Yachts, may be the most versatile new 50 meter design available. She can be easily and economically converted from a six stateroom charter yacht to a private family yacht with much more generous accommodations, in a relatively brief period at the Trinity Yachts shipyard, with minimum expense, compared to a normal major overhaul. This may be the perfect boat for owners who want a unique new charter boat now, but may not want to go through the entire build and design process all over again, when it's time to upgrade to a private yacht with more generous accommodations. The luxury explorer yacht Evolution, from Trinity Yachts: It's "One Boat for the Rest of Your Life."
