

## Lady Michelle – A Real Lady

Delivered and on her way to Europe for showing at Monaco is Trinity's latest launch, the 161-ft (49-m), aluminium tri-deck motor yacht *Lady Michelle*. She was designed by Trinity's head designer and built with special consideration for European operations. She accommodates an owner's party of ten in five staterooms, with an additional day room that can accommodate two further guests. Specific design features include a panoramic sky lounge opening to a covered exterior deck aft on the pilothouse level. The interior, which has been designed by Dee Robinson, is simple yet elegant, leaning towards more contemporary than traditional in design.

The semi-displacement hull is capable of 19 knots powered by two Caterpillar 3512B main engines, which develop 2,250 hp each. ABS and MCA compliant, *Lady Michelle* is also self sufficient for long periods of time in the most remote of locations.
